DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of Group I in the reply filed on January 14, 2005 is acknowledged. The traversal is on the ground(s) that there is no serious burden on search. This is not found persuasive because (1) applicants have failed to show that a coextensive search is a reason for not requiring a restriction requirement, (2) there is no coextensive search because claim 1 as claimed does not require a particular second intake device/controller as required in claim 6 and 29, respectively and , (3) it is a serious burden on the Examiner to have to examine numerous patentability distinct inventions having numerous and diverging issue of patentability, especially when a patent application is limited to one invention.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 6 and 29 are rejected under 35 U.S.C. 102(b) as being anticipated by Matsumoto (US 4 445 473).

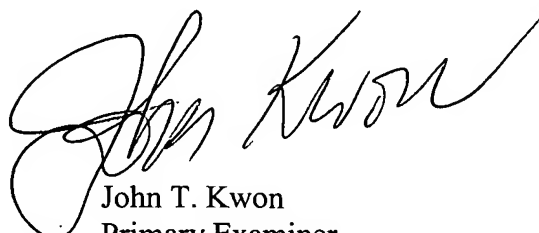

Allowable Subject Matter

Claims 7-13 and 30-33 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
